DETAILS WPC WALL PANEL

Wpc wall panel are ideal for any commercial or domestic, new build or refurbishment cladding project. You can use it as a color-stable alternative to real timber planks. Made from a unique combination of recycled wood and plastic, our highly developed and unique composition combines the traditional appearance of wood with the durability of an engineered composite.

ADVANTAGE

01.
HIGH ECO GRADE
ENVIRONMENTALLY

Fa!E:NOI.YMA!f\$:!A1.

06.
SCRATCH PROOF

DURABLE
AND STRONG

INSTALATION GUIDE

1. Measure the wall

2. Cut off the excess of the product according to your measurement

3. Use Max Bond and with silicon to paste the adhesive glue

4. Flip over the product and apply the adhesive

5. Put and press them to the wall

6. Wait 24hr until completely dry

Clips

Glue

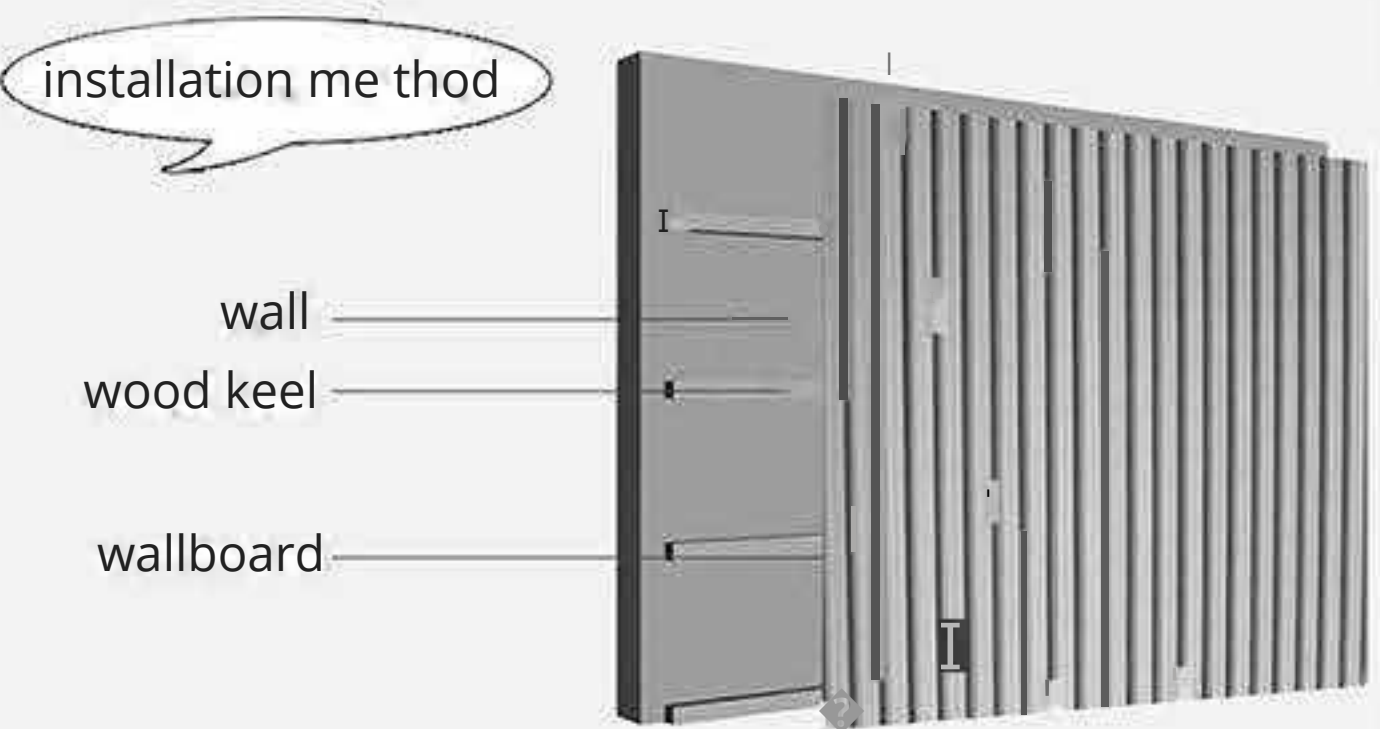

Nail gun

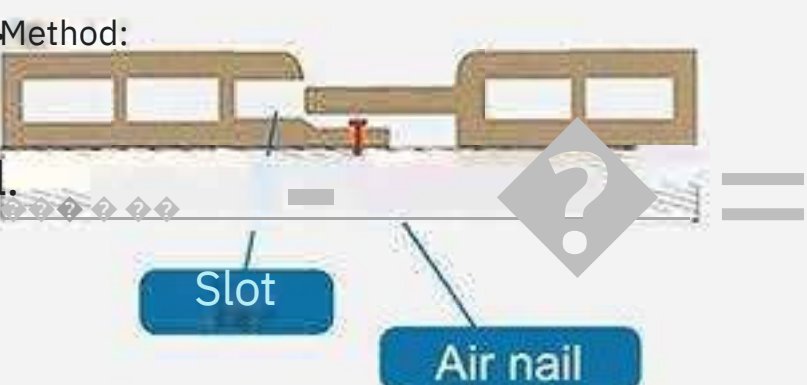

Tape measure

Woodworking planer

Place the keel on the wall, to make sure the base is flat.
First fix the first panel with a gun nail on the keel.
Then insert next panel into the slot and fix it on the keel.
And next by next to finish the whole project.
